EDUCATION

ARIZONA STATE UNIVERSITY

Bachelor's in Computer Science, Minor in Musical Performance (Saxophone) - GPA: 3.91

Tempe, AZ

AUG 2023 - May 2027

EXPERIENCE

Microsoft

Fullstack Software Engineering Intern

Redmond, WA

May 2026 - Aug 2026

- Software Engineering Intern on Microsoft's Experiences and Devices team.

ASU Enterprise Partners, RealmSpark

Software & Venture Analyst Intern

Scottsdale, AZ

Aug 2025 - Dec 2025

- Sourced and evaluated **100+ startups** looking to raise Seed, Series-A, and Bridge rounds; strengthened deal flow **by 20%**.
- Performed **due diligence** on companies, identifying scalability/security risks that influenced **\$2M+ funding decisions**.
- Automated portfolio operations by developing Python scripts, HTTP APIs, and MVP features, reducing manual workflows **by 30%** and accelerating product deployment for portfolio companies.

Arizona State University: CSE 360: Software Engineering

Undergraduate Teaching Assistant

Tempe, AZ

Aug 2025 - Dec 2025

- Taught concepts in Back-end languages (**Java**), **SQL**, Software Process Models, **Agile development**, **Object-Oriented Design**, UML, Data Structures, System Architecture, and **Relational databases**.
- Directly led over 500 students to success in applying concepts of **Algorithmic Design**, **Test Automation** (JUnit), and **Testing Methodologies** (black/white box testing, inspections, reviews).

Make Programming Simple (MPS) Lab

Software Engineer & Research Assistant

Tempe, AZ

January 2024 - January 2025

- Engineered and optimized motion-planning algorithms for autonomous vehicles using **Python** and the Simulation of Urban Mobility (SUMO) framework, focusing on ethical lane-change decision-making and collision avoidance.
- Customized SUMO's lane-changing and forwarding models to simulate **1,000+ autonomous driving scenarios**, improving route efficiency by **15%** and enhancing compliance with traffic and safety protocols.

PROJECTS

Next Prospect (ASU Startup Incubator \$5,000 Award Winner) | Spring Boot, Java, React, PostgreSQL, AWS

- Produced a **full-stack web application** that helps enable AI-driven recruitment, analytics, and direct communication between college athletes and coaches.
- My co-founder and I onboarded **30+ coaches** from universities onto our platform and over **250 student-athletes**.

Fresh Produce Detector | TensorFlow, Keras, Python, Git, Machine Learning, Scikit-learn

- Built and trained a **Convolutional Neural Network** (1.6M parameters, 2 conv layers + dense classifier) to detect whether certain produce (apple, mango, potato, etc) is fresh or rotten; the model achieved **91% accuracy**.

Package Carrier Comparator | Flask, Node, Express, JavaScript, Bootstrap, HTML, Typescript

- Developed a **full-stack web application** that compares shipping rates for packages across USPS and UPS using **RESTful APIs** for real-time pricing information.

DevilQuant (Club Treasurer & Cofounder)

- Received \$2500 in funding to found the first Quantitative Finance Club at ASU and grew it to 50 members.

COURSEWORK & SKILLS

Coursework: Data Structures, Algorithms, Operating Systems, Databases, Cybersecurity, OOP, Distributed Systems, Networking

Languages: C++, Java, Python, JavaScript, Typescript, Node.js, Next.js, React.js, HTML, CSS, Go, Django, Ruby, Perl, Bash, Kotlin, R

Tools: Linux, MongoDB, SQL, MySQL, PostgreSQL, AWS (EC2, Lambda), GCP, Azure Devops, Github, Ansible, Gradle, CI/CD
